

student achievement recording system

	activity	preceding activity	duration (weeks)
1	identify project requirements and scope	-	1
2	project team formation	-	1
3	draft project charter and feasibility analysis	-	2
4	develop system specifications, features, and timeline	1,2,3	2
5	system architecture development and technology selection	1,2,3	2
6	risk management and mitigation plan	1,2,3	1
7	budget planning and resource allocation	1,2,3	1
8	core system and main feature development	4,5,6,7	6
9	integration of student data	4,5,6,7	3
10	development of achievement input and validation modules	4,5,6,7	3
11	feature testing (unit & integration testing)	8,9,10	2
12	dashboard, reports, and digital certificate implementation	8,9,10	3
13	project progress monitoring and milestone completion	4,5,6,7	8
14	performance evaluation and risk management	8,9,10	2
15	conduct user acceptance testing (uat)	13,14	1
16	collect feedback and bug fixes	13,14	2
17	finalize documentation and system launch	16	1
18	user training	16	1
19	project performance and final report	17,18	1
20	system handover	17,18	1
